

## **REMARKS**

### **Revocation of Power of Attorney**

Applicant is enclosing herewith a Revocation of Power of Attorney and Appointment of New Attorney naming BRUCE H. TROXELL as attorney of record in this patent application. It is requested that all further correspondence regarding this matter be forwarded to TROXELL LAW OFFICE PLLC at the address listed on the enclosed form. A CHANGE OF ADDRESS FORM is also being submitted herewith.

### **Claim Rejections**

Claims 1, 2 and 5 are rejected under 35 U.S.C. § 102(e) as being anticipated by Guerrieri et al. (U.S. 2004/0095763). Claims 3 and 4 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Guerrieri et al.

### **Drawings**

It is noted that the Examiner has accepted the drawings as originally filed with this patent application.

### **New Claims**

By this Amendment, Applicant has canceled claims 1-5 and has added new claims 6-10 to this application. It is believed that the new claims specifically set forth each element of Applicant's invention in full compliance with 35 U.S.C. § 112, and define subject matter that is patentably distinguishable over the cited prior art.

The new claims are directed toward a light bulb comprising: a base (A1); a light emitting device (B) having: a circuit board (B3); a light emitting repository (B2) located on a center of the circuit board and having a plurality of light sources; a light reflecting plate (B1) located on the circuit board around the plurality of light sources of the light emitting repository and having an interior surface inclining outwardly a predetermined angle and having a predetermined height; and a plurality of pins (B4) connecting the circuit board to the base; and a bulb (A2) connected to the base and surrounding the light emitting device, wherein rays of light (C) are emitted from the

light emitting repository and refracted by the outwardly inclining interior surface onto the bulb.

Other embodiments of the present invention include: the plurality of light sources are selected from a group consisting of light-emitting diode, incandescent diode, and small-scale light bulb; the light emitting device is a light selected from a group consisting of a vehicle light, an indoor light, an outdoor light, a street light, and a desk light; the bulb has a covering selected from a group consisting of a transparent covering, a fluorescent-coated material covering, and a ground material covering; and a cross section of the interior surface is two diverging straight lines.

The cited reference to Guerrieri et al. teaches an LED light and reflector having a housing (58) having a retention area (44) with pins (24), a circuit board located in the housing and connected to the pins by contacts (38), one of the LEDs (14) located on the circuit board protrudes through each of the apertures (40) in the reflector. The reflector has a plurality of chambers (54) with curved cross sections.

Guerrieri et al. do not teach a light emitting repository located on a center of the circuit board and having a plurality of light sources; a light reflecting plate located on the circuit board around the plurality of light sources of the light emitting repository; a plurality of pins connecting the circuit board to the base; a bulb connected to the base and surrounding the light emitting device; rays of light are emitted from the light emitting repository and refracted by the outwardly inclining interior surface onto the bulb; nor do Guerrieri et al. teach a cross section of the interior surface is two diverging straight lines.

It is axiomatic in U.S. patent law that, in order for a reference to anticipate a claimed structure, it must clearly disclose each and every feature of the claimed structure. Applicant submits that it is abundantly clear, as discussed above, that Guerrieri et al. do not disclose each and every feature of Applicant's new claims and, therefore, could not possibly anticipate these claims under 35 U.S.C. § 102. Absent a specific showing of these features, Guerrieri et al. cannot be said to anticipate any of Applicant's new claims under 35 U.S.C. § 102.

It is further submitted that Guerrieri et al. do not disclose, or suggest any modification of the specifically disclosed structures that would lead one having ordinary skill in the art to arrive at Applicant's claimed structure. Thus, it is not believed that Guerrieri et al. render obvious any of Applicant's new claims under 35 U.S.C. § 103.

**Summary**

In view of the foregoing amendments and remarks, Applicant submits that this application is now in condition for allowance and such action is respectfully requested. Should any points remain in issue, which the Examiner feels could best be resolved by either a personal or a telephone interview, it is urged that Applicant's local attorney be contacted at the exchange listed below.

Respectfully submitted,

Date: October 13, 2005
